Homework 0

This assignment will take you through the steps you'll use to submit written work to Gradescope.

① Obtain a scanner application for your device. (I use Tiny Scanner on my phone. Just search "Tiny Scanner" in the App store / Google Play to download it and use it for free!).

② Write or draw something on a TWO SEPARATE PIECES OF PAPER. This simulates a homework with two problems...

③ Scan the assignment into PDF form using your chosen scanner App.

④ Login to our class on gradescope and find the assignment "Assignment 0: Using Gradescope".
Submit the PDF, marking page 1 as having problem 1 and page 2 as having problem 2.
